What's it like working at the City of Newcastle?

We are focused on making a real difference in our community and achieving our vision of **creating a smart, liveable and sustainable global city**. We are proud to deliver services valued by our community. People come first at the City of Newcastle, which means providing employees with meaningful work and capacity for work life balance. As a large local organisation, the City of Newcastle offers opportunity to develop in your current role, grow into future opportunities and reach your full potential.

Our organisation's values are **Cooperation, Respect, Excellence and Wellbeing** which are underpinned by our behaviours of courage, trust and pride. Together, our values and behaviours support our decision making, our day to day interactions and everything we do.

What's it like working in Information Technology?

Information Technology at the City of Newcastle works alongside our colleagues across all Directorates as a trusted business partner. We work in cross-functional teams to understand the needs of our customers, with a unified goal of serving our community with innovative and sustainable technology solutions.

We leverage an Agile approach that is iterative and transparent, with rapid feedback loops. This allows us to make evidence-based and data-driven decisions to identify the greatest value early on, delivering simple and easy to use experiences to our customers and to our colleagues.

What's the focus of this position?

The Data Office Chapter Lead is accountable for the delivery of high-quality data assets and tools to enable CN to monitor, measure and extract maximum value from service units and enable data driven decisions with the citizen at the forefront. They will be responsible for supervising all digital and data platforms utilised in CN and ensuring the integrity of data collected.

As a chapter lead, the Data Office Chapter Lead acts as a line manager for the data office chapter, focusing on coaching and helping the chapter (and its people) grow as a function. The role acts as a primary interface

within the business through Product Managers. In this capacity they manage and track resources ensuring squads are adequately sourced. As CN moves to an Agile environment this role acts as a champion for cultural change to enhance technology capabilities within CN in line with the 2030 strategic vision.

What you'll be doing:

- Lead and support a team of Data Analysts and Data Architects engaged in the work activities associated with identification, collation and analysis of current data sets for data analysis.
- Act as the centre of excellence for data and guide best practice data management and usage.
- Lead the development and maintenance of front-end dashboards, forms, and other tools to facilitate the interaction with data management systems for CN.
- Identify Risks and Issues with existing data.
- Develop relevant policies and procedures.
- Manage and be accountable for resources, including:
 - the performance cycle and for the personal development of chapter members on their journey to mastery.
 - Be responsible for managing and tracking resources and forward planning including generating reports and track resource utilisation.
 - Responsible for sourcing resources into squads for service delivery.
 - Establish partnerships with organisations that can provide resources with specific skills.
 - Provide training and upskill resources within their designated chapters.
 - Manage and have full knowledge of resources' capabilities.
- Establish and manage partnerships with vendors or providers for services specific to the Data Office capability.
- Continuous review and improvement of services.
- Work closely with teams drawn from other parts of the organisation, as required, to resolve requirements and issues relating to project delivery.
- Provide leadership mentoring and coaching to support team.
- Contribute to the achievement of corporate plans, targets and goals.
- Assure adherence to recognised IT best practice principles such as release and change management.
- Identify any opportunities for CN in terms of new services and cost efficiencies.
- Manage a component of the Information Technology budget approved by CN.
- You will be required to carry out other duties that are within the limits of your skills, competence, training and/or experience as directed by your Manager.

The essentials you'll need:

- Bachelor's Degree in Business, Information Management or a related qualification, and/or demonstrated capability through past employment experience.
- Experience and understanding of solution domains, such as security, infrastructure, network, application frameworks, open interface frameworks and databases.
- Foundation in data analysis and systems development lifecycles (SDLC), including requirements analysis, design, and test techniques.
- An analytical mindset with problem-solving skills.
- Ability to clearly and effectively communicate design processes, ideas, and solutions to teams and external clients alike.
- Experience in developing, maintaining and managing relationships with a wide range of stakeholders including vendors.
- Demonstrated leadership skills and the ability to motivate all levels of staff to provide a quality service.
- Demonstrated capacity to manage, monitor and evaluate a sections budget or experience in the development of budgets and service plans, monitoring and reporting of financial and work performance.
- Extensive experience leading and coaching teams.
- Ability to understand business requirements and technical limitations.
- Demonstrated negotiation, influencing and conflict resolution skills.
- Exceptional interpersonal, presentation, verbal and written communication skills to enable working with business stakeholders at all levels, including complaint resolution.
- Ability to make sound, pragmatic, solutions-focused decisions.
- Demonstrates the values and behaviours that contribute to a constructive, high performance culture.

Other valuable skills you may have:

- Project Management qualification.
- SCRUM certification.
- ITIL certification.
- Extensive experience working in an Agile environment.
